## PERSONAL PROJECTS

### Database (Airline Management System) (10/2022 - 12/2022)

- The "Airline Management System" is a **MySQL-backed database** project aimed at optimizing airline operations. It efficiently manages flight schedules, reservations, and passenger details. Leveraging MySQL's reliability, the system automates processes like ticket booking and ensures data integrity,

### Final Year Project (Tailor Management System) (05/2023 - 03/2024)

- The "Tailor Management System" is a web-based project developed with **HTML, CSS, and JavaScript** to revolutionize the traditional tailor market. This platform streamlines order management, measurements, fabric selection, and appointments, providing an efficient and user-friendly experience for both tailors and customers.

### Parts Shop(Auto Mobile) (09/2023 - 12/2023)

- The "Parts Shop (Auto Mobile)" is a modern web application developed with React for the frontend, utilizing Node.js and Express for the backend. The frontend styling is done using Tailwind CSS,
